

# Domoproof<sup>®</sup> Flexitape

*Flexible fabric for localized reinforcement*

## Description

**Domoproof<sup>®</sup> Flexitape** is a flexible fabric based on polyester fibers. It is used for the localized reinforcement of liquid-applied membranes, both acrylic and polyurethane-based. Its inherent flexibility allows it to stretch together with liquid-applied product, thus bridging gaps or cracks of the substrate depending on the application. It can be used as reinforcement in both new and renovation works, typical applications include cracks on substrate and expansion/construction joints.

## Information

Characteristics	Value
Composition	Polyester Fleece
Weight	60 gr/m <sup>2</sup>
Colour	White

IMPORTERS/ DISTRIBUTORS:

## Features

- Flexible and easy to use, even in difficult areas like corners
- Thin and lightweight, allows for the following of the contours of the surface in which it is applied

## Storage

The product does not expire if stored correctly. It is recommended to be stored in the original and unopened packaging in a dry and well-ventilated place at a temperature between + 5 °C and + 40 °C. The product is not affected by frost .

## Dimensions & Packaging

- Rolls 15 cm x 50 m
- One box contains 48 rolls
- Individually packed in nylon film
